

Ruben Martins

Professional with a Bachelor's degree in Computer Systems Engineering and a Higher Professional Technical Course in Networks and Informatics Security. During my curricular and professional internships at a startup, I played a key role in developing smart home solutions, contributing to both frontend (HTML, CSS, JavaScript) and backend (Python). I also implemented integrations with home automation devices using MQTT and REST APIs. Additionally, I worked with AWS to host and manage system instances, ensuring a stable development and production environment with GitLab and Lambda functions. I have experience with several programming languages and frameworks, including React, Angular, C#, Kotlin e C++, which highlights my versatility and adaptability across different technological contexts. I am currently seeking a new challenge where I can further apply and expand my skills.

Professional Experience

Sep 2025 - Mar 2025

A+CASA, Braga

Professional Internship

I continued the work started during my curricular internship, further developing automation and energy monitoring solutions in Home Assistant. During this phase, we began using AWS to host the system instances and implemented version control practices to ensure greater stability and organization of the projects. In parallel, I contributed to the restructuring of the platform, replacing the previous home automation operating system base with a more modern and robust frontend, supported by a Python backend. This experience allowed me to consolidate my technical skills and gain a broader understanding of the entire development lifecycle.

Feb 2025 - Jun 2025

A+CASA, Braga

Curricular Internship

I took part in the development and implementation of automation and energy monitoring solutions in Home Assistant, focused on device interoperability. My responsibilities included system integration and the creation of custom dashboards for consumption and energy efficiency analysis. I contributed to projects aimed at cost optimization and sustainability, using YAML, Python, and HTML/CSS.

Feb 2022 - Jul 2022

Fujitsu Technology Solutions, Braga

Curricular Internship

Six-month curricular internship at Fujitsu's Network Operation Center (NOC), where I deepened my knowledge of network infrastructure, monitoring, and systems administration. This experience gave me a solid understanding of network configuration and maintenance, complementing and consolidating the IT knowledge I had previously acquired.

○ Oct 2018 - Dec 2018

Happy PC, Braga

Curricular Internship

Three-month curricular internship in the field of computer technical support, where I gained substantial knowledge in this area and was able to build on my previous experience.

○ Feb 2017 - Apr 2017

Happy PC, Braga

Curricular Internship

Three-month curricular internship in the field of computer technical support, where I gained extensive knowledge in this area and was able to complement my previous skills.

Education

○ Sep 2022 - Jul 2025

Polytechnic University of Cávado and Ave (IPCA), Barcelos

Bachelor's degree in Computer Systems Engineering

The Bachelor's degree in Computer Systems Engineering has a strong practical component, focusing on application and systems programming, computer architectures, communication networks, and information and knowledge systems.

○ Sep 2020 - Jul 2022

Polytechnic University of Cávado and Ave (IPCA), Vila Nova de Famalicão

CTeSP in Networks and Informatics Security

The course covers areas such as networking, cable management, and server installation and configuration. It also includes learning programming languages such as C++ and C#. I was trained to carry out forensic audits, encrypt and decrypt local files, and work with voice services.

○ Sep 2019 - Jul 2020

Polytechnic University of Cávado and Ave (IPCA), Famalicão

CTeSP in Energy, Telecommunications and Domotics

I attended this course for 2 semesters, during which I realized it was not the area I wanted to pursue. Nevertheless, it was an academic year of significant learning. The course aimed to train professionals capable of planning, sizing, and executing electrical installations, telecommunications infrastructures, and home automation systems.

○ Sep 2016 - Jul 2019

Amares Secondary School, Amares.

Professional Upper Secondary Course in Computer Equipment Management Technician (10th–12th grade)

I completed the Computer Equipment Management Technician course, where I gained skills in maintenance and repair of equipment, as well as in network and operating system management, strengthening my practical and theoretical foundation in the IT field.

○ **Apr 2018**

Amares Secondary School, Torres Vedras

National Robotics Champion in COSPACE

I was national champion, together with my teammates, in GUI-based programming in the COSPACE competition. We qualified for the World Robotics Championship in Montreal, Canada.

○ **Mar 2018**

University of Minho, Guimarães

Participation in the RoboParty event

I participated in the RoboParty event in 2018, where I had my first contact with robotics. This experience was key in expanding my interest in the field and gaining practical knowledge in technology and automation, while interacting with other students and professionals.
