RUBEN MARTINS

Full-Stack Developer with a degree in Computer Systems Engineering from IPCA. Over 15 months at a home automation and energy startup, I grew from intern to Lead Full-Stack Developer of the A+HOME residential product. I work with Python, JavaScript and React, MQTT and REST API integrations, AWS and Docker. Looking for a development role in Braga, Porto or remote. Available immediately.

EXPERIENCE

LEAD FULL-STACK DEVELOPER

A+CASA – Braga

Apr 2026 – Jun 2026

- Led the development of A+HOME, the company's residential solution, installed in 10 to 20 homes: architecture, technical decisions and delivery planning.
- Evolved the internal back office and the platform's integrations in Python and React.
- Maintained the AWS infrastructure, with Lambda functions and version control in GitLab.

FULL-STACK DEVELOPER (PROFESSIONAL INTERNSHIP)

A+CASA – Braga

Sep 2025 – Mar 2026

- Replaced the Home Assistant interface with a custom front end in HTML, CSS and JavaScript, backed by Python.
- Built an internal back office to set up each client without touching the code.
- Took part in migrating the system to AWS, with Lambda functions and version control in GitLab.
- Presented the A+BIZZ business solution at the company's stand at Web Summit 2025 in Lisbon.

JUNIOR FULL-STACK DEVELOPER (CURRICULAR INTERNSHIP)

A+CASA – Braga

Feb 2025 – Jun 2025

- Developed automations, energy monitoring and consumption dashboards in Home Assistant, for businesses and homes, with Python and YAML.
- Integrated devices via MQTT and REST APIs and installed Shelly and Zigbee sensors on site.

NETWORK OPERATIONS CENTER (NOC) INTERNSHIP

Fujitsu Technology Solutions – Braga

Feb 2022 – Jul 2022

- Monitored the network of a major German car manufacturer with CheckMK, CA Spectrum and Infoblox, and resolved incidents through tickets in GroupITSM.

PROJECTS

NOOK · HOME ASSISTANT SMART HOME DASHBOARD

Code on GitHub

2026

- Designed and built a dashboard in plain JavaScript and CSS, with no dependencies or build step, that adapts to wall tablets, TVs and phones.
- Wrote a Python integration that simulates a 10-room house with about 190 entities: lights, blinds, climate, cameras and 30 days of energy history.
- Prepared the demo for the internet with Docker Compose: visitors can only control the simulated house.

PERSONAL PORTFOLIO

View the site

2026

- Site built with React 19, Vite and Tailwind CSS, in Portuguese and English, on Cloudflare Pages, with Vitest and Playwright tests on GitHub Actions.

RESTAURANT AND HOTEL WEBSITE (FREELANCE)

2026

- Built the website of a restaurant and hotel in Amares with Next.js, including a digital menu.
- Created an online booking system with a PostgreSQL database and an admin back office.

SKILLS

- **Languages:** Python, JavaScript, C#, Java, Kotlin, C/C++, HTML, CSS
- **Front end:** React, Next.js, Tailwind CSS, Vite, Angular (academic)
- **Back end and integrations:** REST APIs, MQTT, .NET, Firebase
- **Cloud and DevOps:** Amazon Web Services (AWS), AWS Lambda, Docker, Docker Compose, Git, GitLab, GitHub Actions, Linux, Cloudflare
- **Data:** PostgreSQL, SQL, Power BI, ETL (Pentaho)
- **Testing and methods:** Vitest, Playwright, object-oriented programming (OOP), Agile and Scrum (academic)
- **IoT and networking:** Home Assistant, Shelly, Zigbee, DNS, DHCP, Cisco

EDUCATION

BSc in Computer Systems Engineering
IPCA, Barcelos | Sep 2022 – Jul 2025

CTeSP in Networks and Information Security
IPCA, Vila Nova de Famalicão | Sep 2020 – Jul 2022

Vocational Course in IT Equipment Management
Escola Secundária de Amares | Sep 2016 – Jul 2019
