

Ruben Martins

Full-Stack Developer with a degree in Computer Systems Engineering from IPCA. Over 15 months at a home automation and energy startup, I grew from intern to Lead Full-Stack Developer of the A+HOME residential product. I work with Python, JavaScript and React, MQTT and REST API integrations, AWS and Docker. Looking for a development role in Braga, Porto or remote. Available immediately.

Work experience

Apr 2026 – Jun 2026
A+CASA, Braga
Lead Full-Stack Developer

Python · JavaScript · React · MQTT · REST APIs · AWS · AWS Lambda · GitLab · Home Assistant

Led the development of A+HOME, the company's residential solution, installed in 10 to 20 homes: architecture, technical decisions and delivery planning. Evolved the internal back office and the platform's integrations in Python and React. Maintained the AWS infrastructure, with Lambda functions and version control in GitLab.

Sep 2025 – Mar 2026
A+CASA, Braga
Full-Stack Developer - Professional Internship

Python · HTML · CSS · JavaScript · MQTT · REST APIs · AWS · AWS Lambda · GitLab · Home Assistant · Twenty CRM

Replaced the Home Assistant interface with a custom front end in HTML, CSS and JavaScript, backed by Python. Built an internal back office to set up each client without touching the code. Took part in migrating the system to AWS, with Lambda functions and version control in GitLab. Presented the A+BIZZ business solution at the company's stand at Web Summit 2025 in Lisbon. Helped implement Twenty, an open-source CRM.

Feb 2025 – Jun 2025
A+CASA, Braga
Junior Full-Stack Developer - Curricular Internship

Python · YAML · HTML · CSS · Home Assistant · MQTT · REST APIs · Shelly · Zigbee

Developed energy monitoring and automations in Home Assistant with Python and YAML. Built energy consumption dashboards for businesses and residential dashboards with device control and automations. Integrated devices via MQTT and REST APIs and installed Shelly and Zigbee sensors on site.

Feb 2022 – Jul 2022
Fujitsu Technology Solutions, Braga

Network Operations Center (NOC) Internship

Monitored the network of a major German car manufacturer and resolved incidents through tickets in GroupITSM. Used CheckMK and CA Spectrum for monitoring, Infoblox for DNS, DHCP and IP address management, and Cisco ISE and Cisco Prime for device administration.

Projects

2026

Nook · smart home dashboard for Home Assistant

Code on GitHub

`Home Assistant` `Python` `JavaScript` `CSS` `Docker Compose` `Cloudflare Tunnel`

Designed and built a dashboard in plain JavaScript and CSS, with no dependencies or build step, that adapts to wall tablets, TVs and phones. Wrote a Python integration that simulates a 10-room house with about 190 entities: lights, blinds, climate, cameras and 30 days of energy history. Prepared the demo for the internet with Docker Compose: visitors can only control the simulated house.

2026

Personal portfolio

View the site

`React 19` `Vite` `Tailwind CSS` `Vitest` `Playwright` `Cloudflare Pages`

Site built with React 19, Vite and Tailwind CSS, in Portuguese and English, on Cloudflare Pages, with Vitest and Playwright tests on GitHub Actions.

2026

Restaurant and hotel website (freelance)

`Next.js` `PostgreSQL`

Built the website of a restaurant and hotel in Amares with Next.js, including a digital menu. Created an online booking system with a PostgreSQL database and an admin back office.

Education

Sep 2022 – Jul 2025
Polytechnic Institute of Cávado and Ave (IPCA), Barcelos

BSc in Computer Systems Engineering

`HTML` `CSS` `JavaScript` `React` `C#` `.NET` `Kotlin` `REST APIs` `Power BI`

Sep 2020 – Jul 2022
IPCA, Vila Nova de Famalicão

Higher Technical Professional Course (CTeSP) in Networks and Information Security

`C++` `C#` `Networking` `Information Security` `Servers`

Sep 2016 – Jul 2019
Escola Secundária de Amares

Vocational Course in IT Equipment Management

Highlights

National robotics champion, COSPACE (2018): with the Escola Secundária de Amares team, qualified for the world championship in Montreal, Canada.
